PASSIVE 1-to-3 DYNAMIXEL TTL / POWER HUB

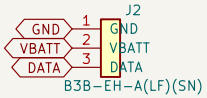

J1 is the nominal controller input; J2–J4 are nominal branches. All four ports are electrically identical.

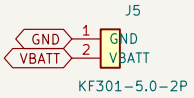

Pin map: 1=GND, 2=VBATT, 3=DATA. J5: 1=GND, 2=VBATT. C1 polarity is mandatory.

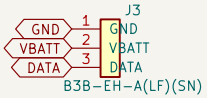

No fuse, regulator, reverse-polarity protection or over-voltage protection is present on this board.

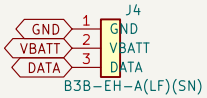

A direct 2S rail exceeds the retail XL330-M288-T published 3.7–6.0 V range; fabrication does not authorize power-up.

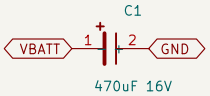

NO FUSE / NO REGULATION / DO NOT POWER UNTIL HARNESS VALIDATION
THIRD-PARTY DERIVATIVE; NOT POLLEN ORIGINAL
Fanduck personal research project
